

Promoting and Validating Key Competencies in Mobility and Traineeships in Europe

PROMOTE aims at setting up holistic competence oriented open learning environments to promote and validate key competences at the interface of academic education and learning in practice business contexts.

The main activities between December 2015 and November 2016 are:

- ✦ Researching existing approaches for acquiring and validating key competences both in higher education and in enterprises;
- ✦ Developing an overarching competence oriented learning and validation approach;
- ✦ Enriching existing validation and certification systems and linking with existing ECTS-based validation and certification;
- ✦ Customising the web-based LEVEL5 system for competences acquired in European mobility, traineeships continuous and professional development programmes.
- ✦ Piloting and evaluating the competence oriented learning and validation system in internships or traineeships;
- ✦ Transferring the project results both into university contexts (to enrich formal curricula) and into the business sector (continuing professional development schemes).
